

Cube markers, IDs 1-5 (45.6 mm markers on 57 mm faces)

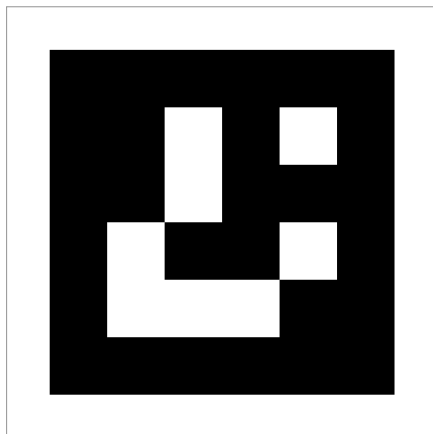

↑
ID 1, top face
(arrow = top edge)

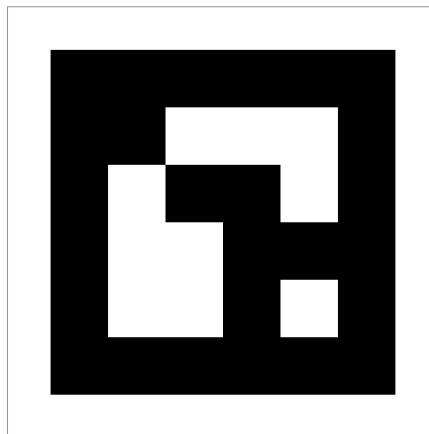

↑
ID 2, side +x
(arrow = top edge)

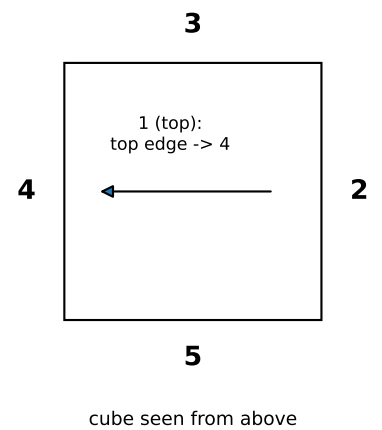

↑
ID 3, side +y
(arrow = top edge)

↑
ID 4, side -x
(arrow = top edge)

↑
ID 5, side -y
(arrow = top edge)

Seen from above, side markers 2 -> 3 -> 4 -> 5 go counter-clockwise. Each side marker is upright: its top edge touches the top face. ID 1 (top face) has its top edge toward the ID 4 face. Bottom face: no marker.

Cut each square on its outline. If a square overhangs the cube's rounded edges, trim the white margin, never the black. Tape around the middle layer so the Rubik's cube cannot twist.

this bar must measure exactly 100 mm; if not, reprint at 100% / Actual size
